

Press Release

## Cochin Port - Performance 2021-22 (Apr-Mar)

Cochin Port had a stellar performance in the year 2021-22 by overcoming the disruptions caused by the successive waves of COVID-19 pandemic. It handled a record cargo volume of 34.55 MMT, registering a growth of 9.68% over 2020-21. In container handling, it secured 4th position amongst all Major Ports by recording highest ever throughput of 7.36 Lakh TEUs, a growth of 6.65% over 2020-21. In POL throughput rose to 21.07 MMT in 2021-22, growing by 13.00% over 2020-21.

These performances are testimonies to the unflinching confidence and support of the trade gained by holding nearly half a century client outreach programmes and responding positively to their needs.

An extensive Strategy Reset resulted in handling of new cargoes like Waste Paper, wood pulp, Synthetic rutile, Caprolactam, Acrylic Acid, Jute products etc, some of which were by way of modal shift from road to Coastal Shipping scripting a success story of Central Government's Sagarmala programme.

An aggressive pricing strategy also helped Cochin Port to garner highest ever transshipment container traffic of 1.56 Lakh TEUs at ICTT, Vallarpadam, which has contributed meaningfully to Hon'ble Prime Minister's vision of making India 'Atmanirbhar'
